Understanding of road user behaviour in **E**urope

PROLOGUE

Topics for Naturalistic Driving Research

Pedro Valero-Mora

Questions

- § Can and should ND be used to validate (calibrate?) other research methods (DBQ, instrumented cars, simulations and simulators etc.)
- § How to validate ND itself?
- § Concrete links to be made to FoT's, SAFER, ...should we form a ND-Net (like Fot-Net)?

More Questions

- § What should we (the consortium) do to convince the EC to fund a large scale ND study?
- § What must we include in the recommendations (one issue per person)?

Thank you!
